Kristine,
We received EPA's comments on DEQ's draft SCD for T5. Sorry you didn't receive our SCD when we sent it out 5/9/07, & thanks for getting us your comments when we asked for them. Tom Gainer will begin responding to your comments & I'll soon let you know when you can expect our response.

During our 6/19/07 Source Control mtg, we agreed that DEQ & EPA should consider developing a management strategy to complete source control at lower & medium priority sites. We discussed whether we could develop a streamlined process for closing these sites without necessarily involving as much DEQ & EPA staff time as we have in the past. I think T5 is a good example of this type of site. DEQ does not consider T5 to be a high priority site. While we agree that additional information would supplement site characterization, we don't think that additional characterization efforts would change the site priority to high..., nor do we think additional efforts are needed to support our SCD that the site does not appear to be a current or reasonably likely future significant source of contamination threatening the Willamette River.

However, we will respond to your comments & see if we can reach common ground on T5.

James M. Anderson

Jim and Tom:

Here are EPA's comments on the Draft Source Control Decision for Terminal 5. Let me know if you have any questions.
